Regarding MB 18-184 (Comments Filed Electronically)

Dear Commissioners:

I am the owner of several broadcast properties including WXJY (FM) in Georgetown, South Carolina. I am writing to indicate my support of the Multicultural Media, Telecom and Internet Council (MMTC) and SSR Communications FM Class C4 / 73.215 proposal that would allow eligible Zone II Class A stations to double their power from 6,000 watts to 12,000 watts.

WXJY (FM) broadcasts an Urban Gospel format to Georgetown and Georgetown County, South Carolina. According to the 2010 US Census, Georgetown has a 56.7% African-American racial makeup and WXJY is the only FM station with programming geared specifically to Georgetown County's African-American population. WXJY is nationally recognized for our service to the community by being nominated for a Stellar Award (Gospel Music) for Station of the Year in 2017.

I respectfully ask that you please implement the MB 18-184 proposal fully and without delay. Many minority broadcasters need this relief.

Sincerely,

Jeffrey M Andrulonis, CRMC
President/Chief Executive Officer
